Tip: buy about 10 % more beads than the count, for spares and beads that roll away.
Codes are the closest shades we found on each brand's official colour chart, not official equivalents. Colours are indicative: compare with your own beads. * Perler P-codes are derived from the official item number (80-190xx); other Perler colours are given by item number. ~ = the nearest shade available, visibly different. DMC = stranded cotton for cross-stitch (approximate).

How to iron your beads

1. Place the beads on the pegboard row by row, following the numbers on the edges.
2. Cover with ironing paper (baking paper works). Never iron the beads directly.
3. Medium heat, no steam. Move the iron in small circles for 10 to 20 seconds.
4. Lift a corner: the beads should be fused but still show a small hole.
5. Let the piece cool flat under a heavy book, then iron the other side.

Ironing is a job for an adult. Small beads: not suitable for children under 3.

Cross-stitch: on 14-count Aida, each square is 1.8 mm; the design is about 2.4 × 2.4 cm.
